

Greetings,

The Sinclair media corporation that owns many stations around the country has announced that it will be broadcasting a blatantly political attack against John Kerry under the guise of "news." This is an abuse of thier use of public airwaves and and acts to sideline our democratic process.

The timing of the broadcast is intended to directly influence the voting public by slandering one of the candidates.

With the looseing of ownership restrictions that has proceeded over the past decades corporations like Sinclair are able to influence peoples opinions by presenting politicaly biased stories and commentary as "news."

The FCC needs to act swiftly on this matter and not allow this broadcast to be unchallenged.

Thank you for your time.
